

FRANCIS FRAGO

Executive Operations | Technology & Automation Leader

Los Angeles, CA • fafrago@gmail.com • portfolio-ffrago.vercel.app • linkedin.com/in/ffrago • github.com/fdrive422

EXECUTIVE SUMMARY

Results-driven executive with 30+ years of progressive leadership in large-scale aviation services operations, including 10+ years as General Manager directing a 300+ person, 12-department organization at LAX. Proven record of driving multi-phase facility expansions (78,000 and 100,500 sq. ft.), enterprise technology integration, and operational process improvement — certified Six Sigma Green Belt. Uniquely positioned at the intersection of executive leadership and technology: holds formal Full-Stack Software Engineering credentials and currently leads active initiatives in robotics automation, cybersecurity governance, and corporate digital transformation.

CORE COMPETENCIES

- Executive Operations & P&L Leadership
- Strategic Planning & Business Development
- Facility Design & Capacity Expansion
- Vendor Procurement & Contract Negotiation
- End-to-End Project Management
- Technology Integration & Automation
- AI Integration & Automation
- Cybersecurity Governance
- Cross-Functional Team Leadership
- Full-Stack Software Engineering
- KPI Development & Performance Analytics
- Six Sigma Process Improvement (SSGB)
- Agile / SDLC Collaboration

PROFESSIONAL EXPERIENCE

General Manager | **Air Fayre** | Los Angeles, CA

May 2016 – Present

Aviation services company providing catering and support to major airline carriers at LAX.

- Direct all daily operations for a 300+ person workforce across 12 departments; oversee full P&L, budget accountability, and strategic planning.
- Executive Project Lead on corporate robotics and automation evaluation — conducting vendor RFPs, operational impact analysis, ROI modeling, and cross-departmental deployment coordination.
- Led two major facility design projects: completed renovation of a 78,000 sq. ft. facility (doubled operating capacity); currently leading buildout of a 100,500 sq. ft. expansion (ongoing).
- Project Lead for ongoing Air Fayre website redesign — defining scope, managing design and development coordination, and aligning digital presence with brand strategy.
- Organizational lead for cybersecurity governance — establishing policy frameworks, coordinating risk assessments, and driving enterprise-wide compliance standards.
- Spearheaded multi-phase enhancement of proprietary enterprise software: led requirements gathering, UAT, and production deployment, yielding measurable operational productivity gains.
- Designed and implemented the company KPI performance database — adopted enterprise-wide as the standard employee measurement vehicle.

Director of Operations | **Air Fayre** | Los Angeles, CA

April 2014 – May 2016

- Drove cross-departmental operational execution, process standardization, and technology system growth initiatives prior to advancing to General Manager.
- Project managed vendor procurement and contract bids, improving operational scalability across all service delivery functions.

Transportation / ESL Manager | **Air Fayre** | Los Angeles, CA

November 2009 – April 2014

- Managed transportation logistics and multilingual workforce training programs; developed SOPs that improved departmental consistency and compliance.

TECHNOLOGY LEADERSHIP & STACK

Languages & Frameworks: JavaScript/TypeScript, Python, Java • React, Next.js, Node.js, Express, Flask, Spring Boot, React Native

Databases & Cloud: MongoDB, MySQL, Firebase • AWS (EC2/Elastic Beanstalk), Vercel • RESTful APIs, GraphQL, OpenAI API, Anthropic API

Active Technology Projects

- Robotics & Automation Evaluation (2023–Present): End-to-end corporate assessment of robotics integration — vendor RFPs, impact analysis, workforce modeling, and executive reporting.
- Air Fayre Website Redesign: Leading full corporate site rebuild — scope definition, design/dev coordination, and brand alignment.
- Cybersecurity Governance: Enterprise lead — policy frameworks, risk assessments, and compliance standards.
- Enterprise Software Program: Project Lead for multi-phase proprietary software enhancements through full SDLC.
- Developer Portfolio (2021–Present): 10+ production full-stack apps including AI-integrated platforms, mobile apps, and dashboards — portfolio-ffrago.vercel.app

EDUCATION, CREDENTIALS & RECOGNITION

Full-Stack Software Engineering | Coding Dojo / Colorado Technical University

- Multi-stack program (Python/Flask, Java/Spring Boot, MERN) • Earned Black Belt Certification (top-performer distinction)

Six Sigma Green Belt (SSGB) Certification | Professional Management Program

- Applied Six Sigma methodology to operational process improvement and quality management across large-scale operations.

Awards & Recognition

- Presidential Award for Client Services Improvements — Medco Health Solutions (2008) • Black Belt Certification — Coding Dojo (2022)
